

4000

The 4000 is a 400mm x 170mm jaw action crusher. Instant hydraulic adjustable jaws allow output product sizes to range from 20mm up to 80mm. Dust suppression is fitted as standard, by means of fine water spray nozzles utilising standard domestic hose pressure.

They are very simple to operate and incredibly cheap to run. Purchasing a 4000 for small scale crushing is a very cost-effective method of avoiding large muck away bills and bought in hardcore costs. Simply drive the crusher into position, select the desired output size, start the crusher and conveyor system and start to crush. Up and crushing in less than 5 minutes.

The 4000 can pass through a doorway meaning back garden sites and awkward access areas can still be accessed. They make light work of reinforced concrete, brick, porcelain, glass and other aggregate type products.

The 4000 simply cannot be matched for its reliability, performance and versatility by anything else in the market.

STANDARD FEATURES

Jaw aperture | 400mm x 170mm

Average product size | 20mm - 80mm

Hydraulic Powered

Kubota 2cyl 10.8KW 14.6HP

DIMENSIONS

Length 3,260mm

Width 780mm

Loading Height 1,600mm

Weight 1,400kg
